

Xinran DU

RESEARCH INTEREST

Felt Understanding, Intergroup Relations, Social Identity, Mental Health, and Open Science

EDUCATION BACKGROUND

University of Exeter, Exeter, UK

09/2020 – present

PhD in Psychology

- **Project:** Felt Understanding: A Key to Understand International Students' Wellbeing
- **Aim:**
 - To assess mental health and wellbeing of international students in UK higher education.
 - To promote felt understanding between international students and UK students via structured-communication.
 - To test whether higher understanding relates to better wellbeing and intergroup relations between international students and UK students.

University of Manchester, Manchester, UK

09/2019 – 09/2020

MRes in Psychology

- **Modules:** Advanced Data Skills, Open Science and Reproducibility, Advanced Statistics Workshop, Advanced Research Methods in Experimental Psychology, Qualitative Research Methods, Contemporary Research Skills, etc.

Guangdong University of Foreign Studies, Guangzhou, China

09/2015 - 06/2019 **BSc in Applied Psychology (Honours)**

- **Modules:** Experimental Psychology, Personality Psychology, Research Methods in Psychology, Social Psychology, Psychology of Communication, etc.

Inha University, Incheon, South Korea

08/2017 - 01/2018 **BSc in Business Administration (exchange) (Honours)**

- **Modules:** Organizational Behaviour, Introduction to Communications, Investigating Regional Culture

RESEARCH EXPERIENCE

Manchester

Dissertation

11/2019 - 09/2020

Exploring Autistic Traits and Perception of Surprise in Decision Making

- Use Gorilla for gambling task and R for data wrangling and analysing.
- Explore the relationship between autistic traits and perceived surprise in surprising events under the Bayesian framework.

- Research Methods: Consider reaction time and error rate in decision making as the functioning of surprise. Build multiple linear regression model and logistic regression model between autistic traits and indicators of surprise.

Guangzhou

Dissertation

09/2018 - 04/2019

Comparative Study on Executive Function of Club Drug Abusers and Traditional Drug Abusers

- Use Eprime for designing tasks and SPSS for t-test and ANOVA.
- Understand the cognitive characteristics of drug abusers, including their ability to inhibit impulses and shift attention.
- Research Methods: The inhibition subcomponent is tested by Stroop task and stop-signal task. The shifting subcomponent is measured by more-odd task and local-global task. Compare the task scores between two different groups of drug abusers.

Guangzhou

Research Project

05/2016 - 01/2017

Comparison of the Differences between Urban and Rural Residents' Gratefulness and National and Social Gratitude

- Use Questionnaire and National and Social Thanksgiving Scale to conduct the research with 200 urban and rural residents in China. Organise team members to carry out research as a team leader.
- Research social mentality and social sentiment theory to provide guidance for the practice of residents' psychological services, and theoretical and practical basis for exploring positive psychology, such as gratitude.
- Conduct ANOVA on gratitude scores to compare the differences between urban and rural residents.
